

IN THE CLAIMS:

1        1. (Currently Amended) A settable mixture comprising polybutadiene, a flow-  
2 enhancing liquid, and dry [particulate material] silica sand, the latter having no more than 2%  
3 water content and [~~being selected to have a~~] containing Aluminum Oxide to a selected  
4 maximum of 2% [Aluminium Oxide], and [a] Ferrous Oxide to a selected maximum of 1%  
5 [Ferrous Oxide], the percentages being by weight of [particulate material] the silica sand.

1        2. (Original) A settable mixture according to Claim 1, wherein the flow-enhancing  
2 liquid is a flow-enhancing solvent.

1        3. (Cancelled)

1        4. (Cancelled)

1        5. (Previously Amended) A settable mixture according to Claim 1, wherein the  
2 polybutadiene is provided in liquid form.

1        6. (Previously Amended) A settable mixture according to Claim 1, including a re-  
2 odoriser.

1        7. (Original) A settable mixture according to Claim 6, wherein the proportion of the  
2 re-odoriser within the mixture is between 0.001% and 5% by weight of settable mixture.

1        8. (Original) A settable mixture according to Claim 2, wherein the flow enhancing  
2 solvent is a de-aromatised hydrocarbon.

1           9. (Currently Amended) A settable mixture according Claim 1, wherein the  
2 [particulate material is silica] sand is of special fraction size in the range of grain size 0.01mm  
3 to 0.85mm and is dried to have a maximum 2% water content by weight absorbed from the  
4 atmosphere after drying.

1           10. (Previously Cancelled)

1           11. (Previously Amended) A settable mixture according to Claim 1, bagged so as to  
2 be contained in an oxygen-free atmosphere.

1           12. (Previously Amended) A settable mixture according to Claim 1, including a  
2 colourant.

1           13. (Previously Amended) A settable mixture according to Claim 1, wherein the  
2 [material] mixture is contained in an oxygen-free atmosphere containing an inert gas.
